Abstract (en)
The insulation unit has an insulation component (4), which is arranged on a building wall (1) made of fresh concrete. The insulation component comprises attachment points (4.1), and a light well is attached to the attachment points. The insulation component is bonded to the building wall and consists of an insulation material (4.3) and a lamination (4.2). A fastening unit i.e. self-cutting anchor bolt, is partially arranged in the attachment points. The light well is arranged at the insulation component by the attachment points. An independent claim is also included for a method for mounting a light well at a housing wall.
