Abstract (en)

[origin: FR2937407A1] The module (4) has a lower face i.e. concave cup (8), placed in a convex spherical bowl (3) of a container support plate. The spherical bowl is provided on a hot plate (2) or an induction type cooking table of an induction cooking apparatus (1). A flat upper face i.e. circular plate (9), and the concave cup are integrated with one another. An electric heating element (10) e.g. induction type heating element, is arranged under the circular plate. An independent claim is also included for an induction cooking apparatus comprising an interface module.
