Abstract (en)

[origin: EP2226892A1] The antenna (1) has a flat emitter section (4) and a meander-shaped emitter section (5) for transmitting and/or receiving high-frequency signals, where the emitter sections are arranged on a flat support (2) e.g. rigid or bendable plastic film. The emitter sections are electrically connected with one another by a spiral-shaped coil (6) arranged on the support. A connection area (9) is provided between the former emitter section and a ground plane (3) for connecting a high frequency cable.
