Abstract (en)

[origin: WO2009070911A1] A dosage indicator for a device for the metered administration of a fluid product, comprising a) a rotatably movable metering element (1) for adjusting the dose to be administered, b) an indicator element (2) for indicating the adjusted dose, and c) a coupling device (3) having c1) a carrying element (4), which can be moved rotatably about a first axis of rotation (L), and c2) at least one rotatable engagement element (5) disposed on the carrying element (4) for the mechanical coupling of the indicator element (2) having the metering element (1), d) wherein the at least one engagement element (5) can be rotated about a second axis of rotation (Q) on the carrying element (4), said axis of rotation extending transversely to the first axis of rotation (L).
