Abstract (en)  
[origin: WO2009087011A2] Marking device (10) comprising a housing, a stamp pad (13) and an ink reservoir (15), wherein the ink reservoir (15) is in fluid connection with the stamp pad (13). The marking device (10) comprises an interchangeable template (12) which is arranged in a lower part (11.1) of the housing in such a way that the stamp pad (13) and the ink reservoir (15) are arranged relative to one another below the template (12) in the lower part (11.1) of the housing. Part of the stamp pad (13) is accessible through an opening (12.1) in the template (12). The template (12) can be fastened manually in the lower part (11.1) of the housing. Furthermore, the housing comprises an upper part (11.2) which can be removed manually in order to allow access to the opening (12.1) in the template (12). When the housing is in an opened state, the lower part (11.1) of the marking device (10) can be pressed by way of the opening in the template (12) against a ball (20), or a ball (20) can be pressed against the opening (12.1) in the template (12).
