Abstract (en)

[origin: WO2009068358A1] Connection platform (1) for a windscreen wiper blade of a motor vehicle, said platform being intended to receive a connector (5) used for coupling to an actuating arm (10). According to the invention, said platform comprises means (30) for reversible locking by elastic deformation that are designed to lock the connector (5) in a direction (20) in which said connector is inserted into the platform (1) through an opening (15') made in a lateral face of said platform. Application to motor vehicle wiper systems.
