Abstract (en)  
[origin: WO2009080421A1] The invention relates to a plastic liquor container for a washing machine, having a rear wall (12) made of at least two plastic components having different strengths, said wall comprising a bearing receptacle (1) for a shaft journal of the washer drum, the receptacle being made from a highly stable material. For this purpose the rear wall (12) of the liquor container is a component produced in one piece. The invention further relates to a method for the production of said liquor container.
