Abstract (en)

[origin: WO2009080577A1] The invention relates to a washing/drying device comprising a process air channel (10, 21, 26) that is open in a drum housing (1) and that is provided to guide process air and to discharge condensate water from a condensation device (15) into the drum housing (1). At least one water discharge channel (24, 27, 28) leads from the process air channel (10, 21;26). The washing/drying device is in particular a washer/dryer.
