Abstract (en)
[origin: WO2009077219A1] The invention relates to a system for regulating at least one quality parameter of a material web, particularly a fiber web in a paper and/or cardboard machine, comprising at least one first regulating system (100, 200) for regulating a water weight profile along a machine running direction (MD direction), and/or in a transverse machine direction (CD direction) of a paper machine, and at least one second regulating system (120, 220), wherein the second regulating system (120, 220) regulates the quality parameter of the material web.
