Abstract (en)  
[origin: CA2707801A1] A method for producing a longitudinal connection for wooden components and a corresponding wooden component, characterized in that a fitting piece (5) is glued in a recess (A) to the outer or bottom sides (6, 7) of the at least two glued laminated girders (1, 2) to be connected in such a way that between the fitting piece (5) and the respective glued laminated girder (1, 2), originating from the tapered and transition regions (E1, E2) of the fitting piece (5) in the direction of the end (3, 4) of the associated glued laminated girder (1,2), a scarf joint (51, 6') is created at least in a partial length of the fitting piece (5).
