Abstract (en)
[origin: EP2227997A1] The base element (52) has a drain channel (51), a drain bowl (4) provided with a bowl base and an odor trap formed by a vertical flow deflection. The odor trap is partially formed outside of the drain bowl. The vertical flow deflection guided to the odor trap is formed outside of the drain bowl. The drain channel and the drain line (5) are arranged on top of each other in a level. The base element is designed like a box and opened downwards. The drain channel is supported on a box cover. The drain channel and the drain line are arranged in a longitudinal extension. An independent claim is also included for an arrangement of a shower base element.
