Abstract (en)
[origin: EP2228099A1] The device has two wings (4,5) which are mounted at the ends (2,3) of an elongated support (1) with reciprocal distance in a common plane. The support is equipped with an anchoring device for mounting the support to the shoulder height in front of the chest of the user. The anchoring device is formed by one or multiple belts (7,8). The wings are made of rigid material, particularly of plastic plates.
