Abstract (en)
[origin: EP2228312A1] The invention relates to a pallet (1) formed of a plastics material, the pallet (1) comprising a substantially planar deck (2) for carrying articles and support elements (4) for supporting the deck, friction elements (20) being mounted in openings in the deck (2) for increasing the friction between the pallet (1) and any prongs of a fork lift, wherein the friction elements (20) extend above the planar deck (2) and below the deck (2).
