Abstract (en)

[origin: EP2228316A1] The machine (1) has a lateral cutter (3) and/or a perforating device provided with a labeling device in a rolling direction (14) for providing a plastic film package of a package composite in a region of a sharpening zone. A longitudinal cutter (4) and/or perforating device are provided with the labeling device for separating an individual package (2) in a longitudinal direction. A label (9) is loosely connected with an individual packaging composite in an adhesive or heat sealing manner while overlying the label on the package of the package composite with a neutralized area (11).
