Abstract (en)
The method comprises pressing together two layers (34, 35) of multi-layered raw paper and wetting a layer of paper before pressing together with another layer, with a medium. A first medium is sprayed or fogged for wetting by a second medium. The spraying degree of the first medium is controlled over its throughput and/or over the pressure in second medium. The medium for wetting is suspension of a liquid-starch-mixture and the second medium is a gas. An independent claim is included for a device for the production of multi-layered raw paper.

Abstract (de)
Bei einem Verfahren zum Herstellen von mehrlagiger Faserbahn, insbesondere mehrlagigem Rohpapier, bei dem mindestens zwei Lagen aus Papier (34, 35) aneinandergedrückt werden, soll wenigstens eine Lage (34, 35) vor dem Aneinanderlegen mit der anderen Lage mit einem Medium benetzt werden.
