Abstract (en)

[origin: EP2228617A2] The device has a base body (3) comprising a band (8) at its lower side. The band is drawn by a clamping wheel (5) with an inner thread in connection with an outer thread (13) of a clamping screw (4) e.g. three-wing screw, in a front base (2), base plate or moving base. An adapter plate (7) is connected with the base body and a red point visor (1) by fastening elements i.e. screws, where height of the adapter plate maximally amounts to half of the base body. The base body has a recess for accommodating the clamping wheel.
