Abstract (en)
[origin: EP2228865A1] The antenna has a bottom part (20) with a metallic base area. A top part (10) is latched with the bottom part. A printed circuit board (30) is held between the bottom part and the top part, where the circuit board carries emitters (31a-31c). The top part includes latching hooks (11a-11b) for latching into mounting opening of a body part (40) of a vehicle. The bottom part laterally projects over the top part. The top part includes a set of stops, which produces a minimum space between the body part having the mounting opening and a rail of the bottom part.
