Abstract (en)

[origin: WO2009080946A2] The invention relates to a method of managing a set of entities each controlling a virtual environment in which user representations evolve. According to the invention, such a method comprises the following steps: monitoring of at least one characteristic of each of said entities and/or at least one characteristic of a corresponding virtual environment; proposal to transfer and/or transfer of at least one of said user representations from a first virtual environment to a second virtual environment, as a function of the said characteristic or characteristics monitored.
