Abstract (en)
[origin: US2009173796A1] Embodiments related to the identification of objects via optically readable tags. One disclosed embodiment comprises an optically readable tag having a data region comprising a two-dimensional array of optically contrasting data features, one or more orientation features located on the tag outside of the data region, and a tracking feature located outside of the data region and having a larger size than the orientation features and the data features.
