Abstract (en)

[origin: WO2009086970A1] The invention relates to a method for image detection for motor vehicles, wherein by means of an image sensor an image of the environment of the vehicle is detected by pixels of an image sensor, and wherein illumination parameters of at least one pixel of the image sensor are set. To this end, for at least two of the pixels different exposure parameters are set at the same time. The invention further relates to a device for carrying out the method.
