Abstract (en)
[origin: EP2230574A1] The wristwatch has a case (2) comprising a tubular glass (3) and flanges (6, 7) arranged on both sides of the glass for forming the case. Clock movement is suspended in the case by being secured to one of the flanges. The glass and another tubular glass (4) are arranged on both sides of a central post (5) such that each glass is held between the central post and the flange. The central post carries connection units i.e. rods (8), for connecting the wristwatch on the case. A joint (81) is placed between each glass and the post.
