Abstract (en)
[origin: EP2230725A1] The device (1) has an L-shaped connection lug (9) connected to a cable (11) of a supply source and connected to a supply terminal (7) carried by an electrical equipment (3) e.g. electrical air heating device. The supply terminal is extended along an orientation direction (D). The connection lug has two concurrent portions (17a, 17b), where the portions are connected to the supply terminal by being arranged along a direction parallel to the orientation direction for respective cable incoming directions (D1, D2).
