Abstract (en)
[origin: WO2009077266A1] The invention relates to a water conducting household appliance, particularly a dishwasher or a washing machine, having a hydraulic circuit, in which cleaning fluid can be recycled and in which at least one further filter (23) is provided for filtering recycled washing liquor. The invention provides that at least one further filter (23) is provided in the hydraulic circuit for filtering recycled washing liquor, said filter being disposed in a region of the hydraulic circuit in which the recycled washing liquor is rotated.
