Abstract (en)  
[origin: WO2009073830A1] An apparatus is described comprising a Power-over-Ethernet interface, a High-Definition Media Interface (HDMI), a Bluetooth interface, a means for decompressing low-latency streaming interactive video and audio from an Internet-based hosting service and outputting the decompressed audio and video through HDMI, and a means for transmitting to the Internet-based hosting service user control information and statistics from received packets. Further, the apparatus is able to receive two interleaved streams of low-latency streaming interactive video.
