Abstract (en)  
[origin: WO2009090092A1] The present invention relates to a gaming and/or entertainment device, particularly in the form of a roulette game device, having a game field comprising multiple wagering fields, onto which a game wage of a player and/or of multiple players may be placed individually and/or in groups, and a playing field, particularly in the form of a roulette wheel, comprising multiple winning fields, of which one or optionally multiple winning fields may be selected by means of a prize determination means. According to the invention, game wagering display means for marking the prize fields are provided on the prize fields of the playing field, which result in prizes according to the game wages having been placed, wherein a detection device is associated with the wagering fields for detecting the wagering fields allocated with a game wager, and wherein a controller for activating the game wagering display means is provided on the prize fields as a function of the wagering fields allocated with game wagers and detected by the detection device.
