Abstract (en)

[origin: US2009170538A1] A mobile location sharing system comprising: enabling a sender wireless device to send a payload including a location descriptor and a list of target identifiers to a group of targets; identifying a preferred communication mode for each in the group of targets; selecting a transmission format for the preferred communication mode; and sending the location descriptor in the transmission format selected for each in the group of targets for audio-visual output.
