Abstract (en)

The present invention refers to a device for soles of shoes, preferably gym shoes, comprising an elastic element (9) combined with an adjustable adapter (11) suitable for increasing the elevation of the user, particularly during a sport practice, in an optimal way because easily customisable by everyone depending on one's own weight and/or on the kind of performed activity. Moreover, the present invention refers to shoes (1), preferably gym shoes, provided with said device.
