Abstract (en)  
[origin: EP2233048A1] The package has support rods (40, 42) running out from a central support element (16) and supporting a goods carrier (30). A central support element (16) comprises a hollow body, which exhibits recesses (20, 22). The support rods are guided and supported by recesses (20, 22). The support rods are directly connected at an interior of the hollow body. One of the support rods comprises a guideslot, which accommodates a part of another one of the support rods. The support rods are made of wood, and the central support element is made of spirally-coiled tracks. An independent claim is also included for a method for delivering a product to a point of sales.
