Abstract (en)

[origin: EP2233402A2] The device has a band channel comprising a cover, which is closed and opened at an interior side by a partial length. The interior side is turned towards a packing piece. The cover is attached to band guiding frames (13) and partially overlaps the band channel at a distance from a channel bottom. The cover comprises a flap element (23) that is provided with a sheet spring element (25) at longitudinal sides of the cover. The spring element is arranged transverse to a longitudinal direction in a projected manner. The cover is attached at the frames by the spring element.
