Abstract (en)  
There is provided a process for production of fabrics that vary in glossiness depending on the viewing angle without loss of soft hand quality and that have a highly aesthetic appearance, as well as fabrics and fiber products obtained by the process. The process for production of fabrics of the invention is characterized by pressurized heat treatment of a fabric containing an organic fiber A with a monofilament diameter of 50-1500 nm, and having a woven or knitted texture. The highly aesthetic fabric of the invention also contains an organic fiber B with a monofilament diameter larger than 1500 nm, as an additional fiber.
