Abstract (en)
[origin: EP2233636A2] The component i.e. frame part (3) has a supporting body (1) casted as a piece, where a connection element (2) i.e. threaded insert, and/or a fixation element (4) i.e. adjusting anchor screw (35), are casted in the supporting body. The supporting body is casted of cement contained mass, plastic contained mass and ultra high strength concrete. The connection element has a steel connection flange with fixation units for connection of machine components. The fixation element has a unit, which enables alignment and fixation of the frame part. Independent claims are also included for the following: (1) a method for manufacturing component for the machine (2) a method for mounting of components.
