Abstract (en)
[origin: EP2233642A1] The device (1) has a fast changing device (3) fastened at an extension arm of an excavator, and a mounting plate (5) fastened at an accessory device. Hydraulic clutches (20) provided at longitudinal sides connect hydraulic lines of the excavator with hydraulic lines that lead to a hydraulic motor in the accessory device. One of the clutches has a block (21) movable in the fast changing device and another block (27) fastened at the mounting plate, where the former block has a coupling plug, and the latter block has a coupling bush.
