Abstract (en)
[origin: EP2233654A2] The slotted channel (1) has a channel profile, where the channel profile has a channel base (3), lateral channel walls (4), a slot-like channel opening (7) and connection flanges (5) projecting at the channel walls for a covering arranged on the connection flanges. The channel opening is arranged flush with the side edges (8) facing the channel walls of the projecting connection flanges and is limited by the side edges. The side edges form overflow edges (9) partially joining in the channel opening. An independent claim is also included for a shower tray with a drainage device.
