Abstract (en)  
[origin: EP2233674A1] The window has glazing panes (3, 4) provided with glass plates (5, 6), and a glazing pane suspension structure (7) partially incorporated at a frame element forming an upper horizontal side of the window. The structure includes a guiding unit connected with the panes. The guiding unit comprises stainless steel flat sections (19) glued against a top edge of a face of the glass plates of the glazing and engaged on a row of roller bearings (15) mounted on fixed axles (14). The bearings of the structure are incorporated into the frame element.
