Abstract (en)

[origin: EP2234001A2] The control device (1) has a retractable control knob which is automatically movable between a retracted position and an extended position by a motor (5). The motor is coupled with the control knob with a coupling unit for movement control of the control knob. The coupling unit has a guide element (9) on which partially helical guide ways (10,11) are formed. The guide element is partially formed as a hollow cylinder.
