Abstract (en)

[origin: EP2234211A1] The conductor terminal has an electrically conductive contact body (12) and a contact spring (1) that is supported at the contact body. The contact spring is provided with a clamping arm that is movable opposite to the contact body, such that the clamping arm is open-worked by a clamping window. The contact body penetrates the clamping window with a contact axle journal (13). The clamping arm runs for contact axle journal.
