Abstract (en)

[origin: EP2234212A1] The actuating device has a slide (23) longitudinally displaced in a housing (24) in cable entry direction from a through opening (28) for a conductor (20). The conductor is connected with a deflecting chamfer kinematically coupled with the free end of the clamp arm for pivoting the clamp arm between its resting position and its open position during insertion or detachment of the conductor.
