Abstract (en)
[origin: WO2009078517A1] Disclosed is a vacuum cleaner. The vacuum cleaner according to the present embodiment includes a connecting hose through which air containing dusts is flowed; a cleaner main body into which the air of connecting hose is introduced; and a hose connection unit composed of a first connecting unit which connects the connecting hose to the cleaner main body and is fastened to the cleaner main body, and a second connecting unit which is connected with the connecting hose and is rotatably connected to the first connecting unit, wherein the first connecting unit includes a first connection terminal for supplying power, and a connecting part which is to be connected with the second connecting unit, and wherein the second connecting unit includes a second connection terminal contacted with the first connection terminal, and an accommodation space which is formed along a periphery of the second connecting unit to accommodate the connecting part.
