Abstract (en)

[origin: WO2009083296A1] The invention relates to a machine tool device with a monitoring unit (24) for monitoring at least one machine tool monitoring region (26), which comprises a control unit (34). According to the invention, the control unit (34) is provided to carry out a recording mode prior to a machining process of the workpiece, in which a characteristic variable (UA, UM) is recorded for a characteristic that is to be taken into account during the machining process of the workpiece.
