Abstract (en)

[origin: WO2009080059A1] Tagging method of the type that provides for printing, arrangement for fixing and application of a tag (8) bearing the identification data onto a pack, coil, or bundle (7) forced to advance by means suitable for the movement of the latter and connected by means of at least one cord/strip/band (5) comprising the stages of printing the tag, arrangement for the fixing of said tag by means of the application of a fixing wire (9) through a hole situated on the tag itself characterised in that the following is carried out on said fixing wire (8): realizing a hook (11) for hooking-fixing at one end, and realizing a tag-unthreading bend (10) at the opposite end having a shape that serves to prevent the unthreading of the previously inserted tag (8) itself, or vice-versa, and application of the fixing tag and wire ensemble (9) obtained in this way onto a head border cord/strip/band (5) of said pack, coil or bundle (7), by means of hooking with said fixing hook (11).
