Abstract (en)
[origin: WO2009083689A1] This invention relates to a security paper (1) comprising a fibrous substrate (2) comprising a watermark (3) having repeating motifs (6), and a security structure (10) that does not completely cover the watermark and has at least one semi-reflective area (18) which is superposed at least partly on the watermark; which paper on the one hand allows observation, through the semi-reflective area (18), at least partially, of one of the motifs (6), and on the other hand allows observation at least partially of another of said motifs (6) in a region (3a) of the watermark (3) that is not covered by the security structure.
