Abstract (en)

[origin: WO2009065396A2] The invention relates to a motor vehicle door lock, equipped with a ratchet mechanism (1, 2) and a pulling/opening device (3 to 8). The pulling/opening device (3 to 8) adopts at least one first and second functional position during the actuation of the ratchet mechanism (1, 2). According to the invention, in the inactive state the pulling/opening device (3 to 8) passes into a third functional position (park position), in which it is mechanically decoupled from the ratchet mechanism (1, 2).
