Abstract (en)
[origin: WO2009083586A1] The invention relates to a device having a component (1), in particular a door, and having a mounting unit (3), in particular a door frame. The invention is based on the object of providing a device that by the use thereof, the mounting of the component on the mounting unit is simplified, and which has a construction such that a good aesthetic impression can be achieved. For this purpose, the device has at least one component (1), at least one mounting unit (3), on which the component (1) can be mounted, and at least one fastening unit (4, 17), which is disposed on the component (1), wherein said fastening unit (17) has at least one first joint element (18) and at least one second joint element (19), wherein said fastening unit (17) is disposed articulated on the component (1) using said first joint element (18), and wherein said fastening unit (17) can be mounted articulated on said mounting unit (3) using said second joint element (19).
