Abstract (en)

[origin: WO2009092484A1] The invention relates to an injector (1) for injecting fuel into a combustion chamber of an internal combustion machine, particularly a common rail injector, having an injection valve element (10) adjustable between a closed position and an open position that can be actuated by means of a control valve (27) comprising a sleeve-shaped control valve element (26) having an inner guide diameter (D1), wherein a circumferential sealing line (39) contacts a control valve seat (29) when the control valve (27) is closed. According to the invention, the sealing line (39) is disposed at a distance (a) radially from the inner guide diameter (D1).
