Abstract (en)

[origin: WO2009083380A1] The invention relates to an adapter for the starter switch of an antitheft device for an automobile, in which said switch is a low-current switch. According to the invention, the adapter includes a high-current power module (9) that can be connected to said low-current switch in order to transmit the low-current signals of said switch in the form of high-current signals.
