Abstract (en)
[origin: WO2009092423A1] The invention relates to a fastening sleeve (1) having a receptacle recess (2) for a connecting element and an adhesive discharge opening (3). At least one expansion element (4) is provided on the fastening sleeve (1) so that the fastening sleeve (1) can be stressed directly after insertion of the same into a sandwich plate (30) without having to wait for the adhesive to cure, in order to engage behind a cover layer (31) of the sandwich plate (30).
