Abstract (en)
[origin: WO2009094964A1] The invention relates to a flat seal (1), especially a seal on the exhaust gas side for an internal combustion engine. Said seal is constituted of at least one monolayer sealing element (4, 11) that has a recess (4', 11'), said sealing element consisting of a high-grade, especially high-temperature resistant, metal material, and of a support element (2, 10) receiving the sealing element (4, 11), said support element consisting of a lower-grade metal material, the support element (2, 10) receiving and guiding the sealing element (4, 11) in such a manner that the sealing element (4, 11) can be fastened and mounted.
