Abstract (en)

[origin: US2009167919A1] A method, apparatus and computer program product are provided for displaying an indication of an object when location information associated with the object describes a location within the current field of view of an imaging device. The indication of the object can be displayed within a map image, live image, etc., when the location information associated with the object describes a location within the current field of view of an imaging device.
