Abstract (en)  
[origin: WO2009089956A1] The invention relates to a pressure measuring module (10) for detecting an absolute pressure or a relative pressure. The pressure measuring module (10) preferably comprises a housing (12) configured as a premold, which accommodates a pressure measuring chip (20). Said chip is electrically contacted either by a punched grid (30) or by at least one conductor, wherein at least one electronic component (28) is provided, which is connected to a section of the punched grid (30) protruding laterally from the housing preferably configured as a premold, or to the at least one conductor, and which is covered by a partition (66) of a cover (62).
