Abstract (en)

[origin: WO2009081330A2] The invention relates to the automatic selecting of images, which are displayed on a screen, depending on an input. An embodiment of the invention provides a system (10) for automatically selecting electronic images depending on an input, comprising - input analyzing means (12) being adapted for receiving an input, for analyzing the received input for dominant colors, and for outputting the analyzed dominant colors, - image analyzing means (14) being adapted for receiving electronic images, for analyzing each electronic image for colors dominant in the image and for outputting the analyzed dominant colors, - image selection means (16) being adapted for receiving the outputted dominant colors from the input analyzing means and the image analyzing means, for processing the received dominant colors, for selecting an electronic image based on the processing, and for signaling the selection. This allows to automatically influencing the atmosphere in an environment such as a home, retail or hospitality environment.
